

ABSTRACT

Karakteristik Frasa Endosnetrik Adjektival dalam Komentar Warganet di akun resep_inspirasi_debm pada Aplikasi Tik Tok

Keywords: Characteristics, adjektival endosnetric phrases, waganet comments, Tik Tok media.

This study aims to describe the characteristics of adjektival endosnetric phrases in the comments of netizens on the @resep_inspirasi_debm account on the Tik Tok application. This research has three problems studied in it. These problems include (1) the form of structure, function and relationship of meaning between elements of adjektival coordinative endocentric phrases; (2) form of structure, function and relationship of meaning between elements of endocentric attributive adjektival phrases; and (3) the form of structure, function and relationship of meaning between elements of adjektival appositive endosnetric phrases. The three problems above are analyzed based on the study of syntax.

This study used a qualitative research approach and type that used findings by describing the data obtained. The data in this study were obtained from the utterances of netizens in the comments column on the @resep_inspirasi_debm account on the Tik Tok application, which contains the use of adjektival endosnetric phrases. The data collection method in this study used the listening method with basic and advanced techniques. The basic technique used is the tapping technique, while the advanced technique used the free-involved listening technique (SBLC). The data analysis used in this study used the distribution method.

The results of this study show that there are various forms of adjektival endosnetric phrase structures which are differentiated into coordinative and attributive. The form of the coordinative endosnetric phrase structure is distinguished by the form of the structure using conjunctions or not using conjunctions. The structural forms of attributive endocentric phrases are differentiated into D-M (explained-explained) and M-D (explained-explained) structural forms. The syntactic function from the results of this study found a function that occupies the predicate and adverb functions. In addition, the meaning relationship between the elements of the adjective endosnetric phrase was found, namely (addition meaning relationship); (relationship meaning election); (very meaningful relationship); (relationship meaning repetition); (relationship meaning denial); (degree meaning relationship); (relationship of the meaning of completion); and (level meaning relationship).

The conclusion of this study, the data that has a lot of opportunities to be found, first is data of attributive adjective endocentric phrases, then is data of adjective coordinative endocentric phrases. The data of adjective appositive endosnetric phrases in this study were not found.
