

ABSTRACT

Formation of Students' Tolerance Character (Study of Analysis of Instilling Tolerance Values at SDN Dapenda I) 2023 Ayu Riyandini

Keywords: Tolerance Character, Elementary School

This study aims to determine the cultivation of the character of tolerance in fifth grade students. This type of research is descriptive qualitative. The determination of research subjects was carried out purposively. The research subjects were school principals, teachers, and fifth grade students.

This research was conducted on 27 August 2021-2022. Data collection techniques used are interviews, observation and documentation. Data were analyzed using the Miles and Huberman model, namely data reduction, data presentation, and drawing conclusions.

The results of the study show that, 1) the efforts made by the principal and teacher in instilling an attitude of tolerance, namely accustoming students to routine activities by accustoming students to shaking hands with the teacher and praying according to their respective religions and beliefs, through example by setting an example tolerance towards students, through conditioning inside and outside the classroom, through spontaneous activities carried out when the teacher encounters students who are intolerant of other people, helps students see similarities, trains students to see differences from an early age, and integrates them into the subject, in integrating into subjects, learning activities are carried out by inserting tolerance to students. 2) in instilling tolerance values does not always run smoothly, sometimes there are obstacles that are passed by the teacher.
