

ABSTRACT

Analysis of Campus Student Activities Teaching 4 in Forming Pancasila Student Profiles in SDN Lembung Barat of Lenteng District: 2023. Moh Royhan Firdaus.

Keywords: Teaching Campus Students, Pancasila Student Profile

This research was conducted with the aim of finding out how the profile of pancasila students was formed, as well as to find out what the implications were for students at SDN Lembung Barat which were carried out by campus students teaching class 4.

This research used a descriptive qualitative approach, with data collection methods using observation activities, interviews and documentation, the informants of this study included campus student tutors teaching 4, homeroom teacher class, Student, and campus students teaching Batch 4. The content in this study was in the form of a deskriptive narrative.

The results of this study indicate that the activities carried out by campus students teaching class 4 in forming Pancasila student profiles have positive implications or impacts for students at SDN Lembung Barat. This is demonstrated by direct observation and interviews with informants regarding the application of the 6 dimensions of the Pancasila student profile. as the competence and basic character of a Pancasila student needed to prepare quality human resources.
