

ABSTRACT

Keywords : Social Services, Handling, Mental Disorders

This study was conducted to determine the role of the Social Service in fulfilling the rights to handle people with mental disorders in Sumenep Regency. and what obstacles are experienced by the Social Service in fulfilling the rights to handle people with mental disorders.

This type of research uses a qualitative research approach method with a descriptive type and the data sources obtained are primary data and secondary data, data collection used is observation, interview, and documentation techniques and the analysis techniques used are data reduction, data presentation and drawing conclusions.

The results of the study conducted by the researcher show that the Social Service makes efforts to handle ODGJ from a social perspective only, and for medical treatment it is handed over to the Health Service, in this case the Social Service collaborates between agencies to provide appropriate treatment for people with mental disorders, for the obstacles felt by the Social Service, namely the lack of funds obtained by the Social Service in providing assistance to families of people with mental disorder
