

ABSTRACT

The Influence of the Implementation of Civics Subjects on the Formation of Students' Social Character at MI. Al-Hikmah Pragaan Daya Pragaan Sumenep: 2024. Moh. Affan.

Keywords: Implementation of PPKN Subjects, Formation of Social Character

This research is motivated by the implementation of Pancasila and Citizenship Education (PPKn) subjects in shaping the social character of students at Madrasah Ibtidaiyah Al-Hikmah which is one of the madrasahs in Pragaan Daya Village, Pragaan District, Sumenep Regency which is the location of the researcher in conducting the research. The formulation of the problem in this study is how the implementation of PPKn subjects influences the formation of social character of students at MI. Al-Hikmah Pragaan Daya Pragaan Sumenep.

The data collection technique in this study used observation and questionnaire methods. The data collection method used was purposive sampling. While the sampling technique in this study used the Slovin formula with $n = N / 1 + N (e)^2$ which produced 44 respondents. The data analysis techniques used were validity test, reliability test, classical assumption test, simple linear regression, t test, and coefficient of determination.

The results of the simple regression analysis obtained $Y = 25.606 + 0.430X + e$. This shows the value of the regression coefficient X of 0.430, for the variable of the application of PPKN subjects is positive towards the formation of social character. Thus, if the application of PPKN subjects increases by one unit, then the formation of social character will increase by 0.430 assuming other variables are in a fixed or constant state. In the calculation of the coefficient of determination, the application of PPKN subjects has an effect of 20.9% on the formation of social character.
