

## **ABSTRACT**

*Keywords: Dramband Extracurricular, Pancasila Student Profile*

*The purpose of this study was to understand the implementation of extracurricular drumband at SDN Pajagalan II. This research used a descriptive qualitative approach with data collection methods through observation, interviews, and documentation. Informants in this study included the principal, accompanying teachers, and coach teachers. The results of this study are presented in narrative form.*

*The research method used in this research is Descriptive Qualitative. Data collection was done through passive open observation, interviews, and documentation. Data analysis techniques include data reduction by abstraction, data presentation in the form of a brief description, and conclusion drawing (verification) which is then continued with data triangulation.*

*The results of this study show the implementation of the Pancasila Learner Profile in extracurricular drumband at SDN Pajagalan II. The principal, accompanying teachers, and trainer teachers instill the Pancasila Learner Profile with two dimensions as follows: 1) Working together, which includes elements such as collaboration, caring and sharing. 2) Creative, which includes elements such as Generating original ideas, and Producing original work involves creating work.*
