

ABSTRAK

ANALYSIS OF THE IMPLEMENTATION OF PANCASILA STUDENT PROFILE ON ENVIRONMENTAL AWARENESS ATTITUDES IN FOURTH GRADE STUDENTS AT SDN PANGARANGAN III: 2024. Luthfiah

Keywords: *Pancasila Student Profile, environmental awareness attitude*

The Pancasila Student Profile, an integral part of the Merdeka Curriculum, consists of six main elements: Faith and Devotion to God Almighty, Global Diversity, Mutual Cooperation, Independence, Creativity, and Critical Thinking. This research focuses on the Mutual Cooperation. The aim of this study is to examine the efforts to implement the Pancasila Student Profile towards environmental awareness attitudes in fourth-grade students at SDN Panggarangan III.

The research methods used include observation, interviews, and documentation. Data were collected through in-depth interviews with Mrs. Eva Anggraini, S.Pd., the fourth-grade representative at SDN Panggarangan III, and direct observation of the programs implemented at the school.

The results of the study show that through the integration of religious values and mutual cooperation activities, students' environmental awareness attitudes can be significantly enhanced. Through a holistic and contextual approach, as well as good cooperation between teachers, students, and related parties, SDN Panggarangan III has successfully instilled environmental awareness and responsibility in fourth-grade students. This study recommends that other schools adopt a similar approach to build students' environmental awareness, and suggests further support from the government and community to address facility and resource limitations.
