The Influence Of *Mentimeter* Media On Students' Critical Thinking In Class IV Science Learning At SDN Sergang II. Nur Salim 2024

*Keywords: influence, media meter, critical thinking, science learning.*

The aim of this research is to determine the effect of mentimeter media on students' critical thinking abilities in class IV science learning at SDN Sergang II for the 2023/2024 academic year. The research approach used in this research is quantitative research. The method used in this research is an experimental method in the form of Pre-Experimental Design in the form of One Group Pretest-Posttest Design. The subjects of this research were 17 class IV students at SDN Sergang II Kec. Batuputih. The research was carried out from 26 March 2024 to 06 May 2024 in the even semester 2023/2024 academic year. The data collection technique in this research uses test.

Based on the research results, it was found that Mentimeter media had an influence on the critical thinking of fourth grade students at SDN Sergang II in science and science learning with the results of the hypothesis test or T test, the value of  $\text{Sig} = 0.001 < 0.05$ , which means that  $H_0$  is rejected and  $H_a$  is accepted, meaning that there is an influence of the media. meter towards students' critical thinking. This means that there is an influence of mentimeter media on students' critical thinking ability in grade IV science learning at SDN Sergang II.
