This research is motivated by the existence of facts based on pre-survey results at SDN Kalimo'ok I, that there are still many grade IV students who are negligent in implementing character values, especially the character of responsibility. This occurs due to a lack of awareness among students and a lack of integration of character education into subjects. The purpose of this study was to determine the relationship between school discipline and the formation of the responsible character of grade IV students in the pancasila education subject at SDN Kalimo'ok I.

This research uses a quantitative approach with a correlational design. The subject of this research were all IV grade students as many as 33 students. Data collection techniques in this research use observation, questionnaires and documentation. Of data analysis techniques consisting of validity test, reliability test, normality test, and linearity test. Meanwhile, to test the hypothesis the researcher used the pearson product moment correlation test and significance test.

Based on the results of this research, it shows the correlation coefficient value = 0,689. From these result it can be interpreted that there is a positive relationship between the two variables because $r_{hitung} > r_{tabel}$ ($0,689 > 0,344$) at the 5% significance level. The correlation significance value can be $t_{hitung} = 5,287$, whereas $t_{tabel} = 2,039$ at the 5% significance level. Therefore, from these two values it can be interpreted that the value $t_{hitung} > t_{tabel}$ ($5,287 > 2,039$). Thus, from the test results the alternative hypothesis (H_a) can be accepted, and the null hypothesis (H_0) is rejected. So, it can be concluded that there is a positive and significant relationship between school discipline and the formation of the responsible character of class IV students in pancasila education subjects at SDN Kalimo'ok I.
