Keywords: *Speaking Skills, Learning Methods, Discovery Learning, Learning Media, Audio Visual*

This study aims to describe the results of the use of the discovery learning method with Audi visual learning media
in improving students' speaking skills at MTs Integral Al Qadiri

This type of research is PTK research Data collection using observation techniques, structured interviews, and test documentation. To check the validity of the data, use source triangulation.

The results of the study showed that this research was carried out very well, starting with Planning, and then learning activities with two cycles containing preliminary, core, and closing activities. The strengthening of the Pancasila student profile in the critical reasoning dimension was carried out well, based on achievement indicators, namely, improving students' speaking skills in negotiation text materials. The independent dimension is also well implemented based on
