

## **ABSTRAK**

*The relationship between parental attention of migrants and student independence in the P5 program of SDN Marengan Laok I: 2025. Mariyono..*

*Keyword: P5, Parental attention, student independence.*

*This study aims to determine the Influence of Migrant Parents' Attention on the P5 Program on the Dimension of Independence of SDN Marengan Laok 1. The research method used is quantitative descriptive.*

*The study was conducted at SDN Marengan Laok I. The sampling technique used purposive sampling with certain considerations with a population of all 3rd grade students of SDN Marengan Laok 1 totaling 43 students. The research instrument was a questionnaire on parental attention to student independence, which had been tested for validity and reliability.*

*The results of the study showed that the attention of migrant parents influenced the P5 program on the dimension of independence of grade III and IV students of SDN Marengan Laok I. This was shown from the results of data calculations, namely hypothesis testing using the  $t$  test with the help of SPSS. The results of the  $t$  test obtained a  $t$  count value of 2.228 and a  $t$  table of 2.145 so that  $t \text{ count} > t \text{ table}$ . Because  $t \text{ count} > t \text{ table}$ ,  $H_a$  is accepted and  $H_0$  is rejected, meaning that the attention of migrant parents influences the P5 program on the dimension of student independence.*
