

ABSTRACT

Karakteristik Frasa Endosnetrik Adjektival dalam Komentar Warganet di akun resep_inspirasi_debm pada Aplikasi Tik Tok

Keywords: : characteristic, endocentric phrase, Madurese Language, Storybook "Kaneserre Pona Boeroen Alas".Key words

This research aims to describe the Characteristics of Endocentric Phrases of Early 19th Century Madurese Language in the Story Book "Kaneserre Pona Boeroen Alas" by M. Mangoedikarja. The purpose of this research was to identify three problems in the storybook. Those are (1) the characteristics of Madurese language coordinative endocentric phrases in the early 19th century in the storybook "Kaneserre Pona Bhoroen Alas" by M. Mangodikarja; (2) the characteristics of Madurese language attributive endocentric phrases in the early 19th century in the storybook "Kaneserre Pona Bhoroen Alas" by M. Mangodikarja, ; and (3) the characteristics of Madurese language appositive endocentric phrases in the early 19th century in the storybook "Kaneserre Pona Bhoroen Alas" by M. Mangodikarja. Those three problems were analyzed based on syntactic studies.

This research used a kind of qualitative research and approach method that uses discoveries which is describing the data obtained. The data in this study were obtained from the book of Early 19th Century Madurese Language in the Story Book "Kaneserre Pona Boeroen Alas" by M. Mangoedikarja. The data accumulation method in this study used the basic technique and advanced techniques. The basic technique used is tapping technique, while the advanced technique uses the technique of (SBLC). The data analysis used in this research uses the Agih method.

The results of this study represent that there are various forms of endocentric phrase structure divided into coordinative, attributive and appositive. Coordinative endocentric phrase structure distinguished by using conjunction or not using conjunction. The attributive endocentric phrase structure is divided into D-M (diterangkan-menerangkan) and M-D (menerangkan-diterangkan). The syntactic function of the results of this study found a function that occupies the predicate and adverbial functions. In addition, the meaning relationship between the elements of the adjectival endocentric phrase is found, namely (addition meaning correlation); (selection meaning correlation); (very meaning correlation); (repetition meaning correlation); (denial meaning correlation); (degree meaning correlation); (completion meaning correlation); and (level meaning correlation).

The conclusion of this research is that there are several pieces of data found, the first is the data of coordinative endocentric phrases, the next is the data of attributive endocentric phrases. As for the appositive endocentric phrase data in this research, it is found but relatively less
