

ABSTRAK

Perbandingan Motivasi Belajar Pendidikan Jasmani Sekolah Menengah Pertama Negeri dan Sekolah Menengah Pertama swasta (Studi Pada SMP Negeri 1 Bluto dan SMP Miftahus Sa'adah). 2015. Ainurrahman Budi Darma

Kata kunci: Motivasi Belajar Pendidikan Jasmani Sekolah

Penjasrkes merupakan bagian integral dari pendidikan keseluruhan yang memberi kontribusi kepada perkembangan-perkembangan individu melalui aktifitas fisik gerak. Penelitian ini dilakukan untuk mengetahui perbedaan motivasi belajar pendidikan jasmani sekolah menengah pertama negeri dan sekolah menengah pertama swasta (studi pada smp negeri 1 bluto dan smp miftahus sa'adah)

Populasi dalam penelitian Populasi dalam penelitian ini adalah kelas VIII SMP Negeri 1 Bluto. Dan kelas VIII SMP Miftahus Sa'adah. Jenis penelitian ini adalah menggunakan penelitian non eksperimen dengan menggunakan deskriptif kuantitatif. Pengambilan sampel dalam penelitian ini dilakukan dengan metode "*Cluster Random Sampling*". *Cluster Random Sampling* dilakukan dengan memilih secara random adalah sub kelompok populasi, bukan individu yang menjadi anggota populasi. Semua anggota dalam sub kelompok memiliki karakteristik karakter yang sama. Instrumen penelitian yang digunakan dalam penelitian ini adalah berupa skala likert yang diberikan kepada sejumlah sampel penelitian. instrumen ini digunakan untuk mengukur tingkat motivasi siswa, masing-masing angket terdiri atas 47 pernyataan. Data dari penelitian dianalisa menggunakan teknik analisis uji-t dengan menggunakan bantuan SPSS 16.0 For windows.

Berdasarkan uji hipotesis yang menggunakan uji t dihasilkan nilai sig 0,000 dengan $p<0,05$ sedangkan nilai t hitung untuk Negeri sebesar 60.094 dan Swasta 52.754, hal ini menunjukkan ada perbedaan Motivasi Belajar Pendidikan Jasmani Sekolah Menengah Pertama Negeri Dan Sekolah Menengah Pertama Swasta (Study Pada Smp Negeri 1 Bluto Dan Smp Miftahus Sa'adah)

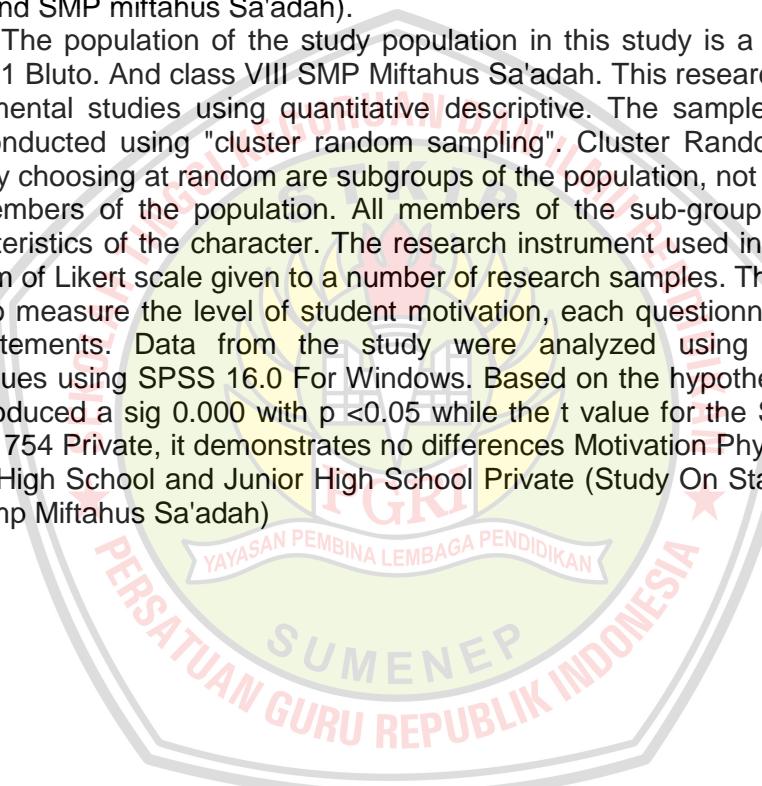

ABSTRACT

Motivation Comparative Study of Physical Education Junior High School and private junior high school (SMP Negeri 1 Study On Bluto and junior Miftahus Sa'adah). 2015. Ainurrahman Budi Darma

Keywords: Motivation for Physical Education School

Penjasrkes an integral part of the overall education that contribute to the developments of individuals through physical activity motion. This study was conducted to determine differences in motivation to study physical education junior high schools and private secondary schools (study on domestic SMP 1 Bluto and SMP miftahus Sa'adah).

The population of the study population in this study is a class VIII SMP Negeri 1 Bluto. And class VIII SMP Miftahus Sa'adah. This research is using non-experimental studies using quantitative descriptive. The samples in this study was conducted using "cluster random sampling". Cluster Random Sampling is done by choosing at random are subgroups of the population, not individuals who are members of the population. All members of the sub-group has the same characteristics of the character. The research instrument used in this study is in the form of Likert scale given to a number of research samples. This instrument is used to measure the level of student motivation, each questionnaire consists of 47 statements. Data from the study were analyzed using t-test analysis techniques using SPSS 16.0 For Windows. Based on the hypothesis test using t test produced a sig 0.000 with $p < 0.05$ while the t value for the State of 60 094 and 52 754 Private, it demonstrates no differences Motivation Physical Education Junior High School and Junior High School Private (Study On State smp 1 Bluto And Smp Miftahus Sa'adah)
