

ABSTRACT

ISMAIL. ATTENTION PARENTS RELATIONSHIP WITH LEARNING MOTIVATION IN CLASS IX Junior 4 SUMENEP STATE OF LESSONS 2014/2015.

Keywords: Attention Parents, Learning Motivation

A person is said to be successful in learning if there is a desire within themselves to learn, because without knowing what will be learned and did not understand why it has to be learned, then the learning and teaching is hard to achieve success. Desire or impulse is called as motivation. With the motivation of people will be encouraged to work towards its goals and objectives as confident and aware of the goodness, interests and benefits. For students motivation is very important because it can move towards a positive student behavior so that they can face any charges, and bear the risk of difficulties in learning. While the specific objectives are: 1) To determine the existence of Attention Parents' Relationship With Student Motivation Class IX SMP 4 Sumenep.

This research is quantitative. Where the data obtained in this study described quantitatively by statistical test then we will get an idea of the magnitude of the impact of Attention Parents' Relationship With Student Motivation in class IX in SMP Negeri 4 Sumenep. Data collection was performed using instruments developed by researchers. The data analysis technique used is the analysis of the percentage and Product Moment Correlation Person.

Based on the analysis of data obtained by the value of the correlation coefficient (r) of 0.765 and $p = 0.038$ at 0.01 significance level. If these results are interpreted as rude or simple by matching the results of the calculation of the correlation index numbers " r " product moment, it turns out the magnitude of r_{xy} (0,765) which amounts ranging from 0.600 to 0.800 means between variables X and Y Correlated enough. By examining the table value " r " product moment it turns out that with $N = 62$, obtained the " r " table at the significance level of 95% amounting to 0.254, while the 99% significance level of 0.330. Thus it can be seen " r " count is higher than the " r " at the table level signikansi 95% and at 99% significance level. It was concluded that "There is a relationship Attention Parents With Student Motivation Class IX SMP 4 Sumenep Academic Year 2014-2015".
