

## ABSTRACT

Analysis of the Availability of Facilities and Infrastructure for Physical Education, Health and Sports at SMA N 1 Arjasa Sumenep in 2021. Ahmad Adi Syahroni

**Keywords:** *Interests, talents, facilities and infrastructure*

Education is a very important effort made by humans to grow and develop all the potential that exists in humans themselves, both cognitive, affective and psychomotor potentials. Therefore, education occurs both within the family, social community, and in educational institutions. And education is also a supporting factor in achieving the goals of physical education, sports and health by requiring the availability of adequate facilities and infrastructure in schools.

This research method uses qualitative research methods, the subjects of this research are students and teachers of SMAN 1 Arjasa Sumenep. Data was collected by means of observation, interviews and documentation. Data analysis was carried out by selecting the main things from the data that had been obtained, then presented in the form of descriptions and the like which were then concluded to make it easier to understand the results of the study.

The results of this study can be concluded that, the availability of physical education facilities and infrastructure at SMA Negeri 1 Arjasa is adequate, including facilities for theoretical learning consisting of classrooms and all their furniture, as well as facilities for learning physical education and sports practices in accordance with the minimum provisions regulated in the ministerial regulation number 24 of 2007 concerning Standards for School / Madrasah Facilities and Infrastructure.
