*Football is a team game sport that demands teamwork. Club Indoras FC is a football club in Kalianget. The problem experienced by Club Indoras FC is the mastery of basic shooting techniques that are still not mastered by players in football games, such as lack of power, accuracy, targets, and finishing . The purpose of this study was to determine the shooting technique skills of Club Indoras FC football players in 2022. This research was carried out from May 25 - June 25 2022, the population of this study was Club Indoras FC Kalianget, Sumenep Regency. The method used is a survey method with cluster sampling sampling of 25 samples. Data analysis techniques used are mean, standard deviation, and increase. The instrument in this research is skills in performing basic shooting techniques. The results showed an average shooting result of 85.08 with a good category of 28%, and a frequency of 7 players. In general, the basic shooting technique skills of Club Indoras FC football players are in a very good category, this happens because during training the players are quite enthusiastic in participating in the training process and applied optimally. Furthermore, efforts that can be made are, players are expected to always be active and concentrate in participating in the training process, especially basic football techniques so that the material presented during practice can be well received.*
