

ABSTRACT

A SURVEY OF THE USE OF PHYSICAL EDUCATION IN HEALTH AND RECREATIONAL MEDIA IN IMPROVING GROUND MOTORCYCLE FOR STATE SLB STUDENTS OF SARONGGI FOR THE ACADEMIC YEAR 2021-2022

Keywords: learning media, gross motor

Gross motor development is a function of maturity and experience, in educational learning to improve students' motor skills. The formulation of this research is whether the learning media for Physical Education, Sports and Health provide an optimal impact in order to improve the motoric development of students at SLB Negeri Saronggi,

This study aims to determine the impact of learning media for Physical Education, Sports and Health on students' gross motor development at SLB Negeri Saronggi. Data analysis in qualitative research was carried out during data collection and after data collection was completed within a certain period.

The existence of PJOK learning media in SLB Negeri Saronggi is still lacking, but it is certain that it is feasible to use and does not endanger students in learning. The limitations of the tools or media used in the Saronggi State SLB are still not as expected, the usual or standardized learning media should be used in regular schools to be more effective, the PJOK learning media in the Saronggi State SLB is still not in accordance with the student's needs,

The learning process is still less effective because the tools or media corners are still standard and less effective to use, so the learning media should be modified so that students' needs are met and can support the improvement of students' motor skills in children's learning activities to be more leverage.
