

ABSTRACT

Dwi sinta pratiwi. 2022. Contribution of salt ponds to the socio-economic conditions of the people in the village of tepipapas thesis of the Pancasila education study program and citizenship of the Sumenep PGRI STKIP

Keywords: contribution of salt ponds and sosio-economic

The purpose of this study was to determine the socio-economic conditions of the communities in the village of tepipapas and the service was carried out in the village of tepipapas in 2022. The type of research used was naturalist qualitative research because the research was carried out in natural conditions. The data collection techniques used are observation, interview, and documentation techniques.

The result of this study indicate that village of tepipapas not only makes farmers prosperous with the crops they have, but the people there are able to create a very high social sense related to the existence of salt ponds. Therefore, the people here have never felt so disappointed with the existence of salt ponds, but they are proud of it. Especially with the existing traditions, it has shown that the people have care about each other or work hand in hand with regards to the existing social.
