This research entitled Dynamics of Practice Sundanese Tradition in Pre-Marriage of Bajo Tribe in Sapeken Village is a research conducted on sapeken Island. The object of this research is to find out the dynamics of the pre-wedding practice of Sundanese tradition of the Bajo Tribe in Sapeken Village.

The research method used is a qualitative approach with the type of case study research, data collection techniques are carried out through observation, interviews, and documentation. There were fifteen research informants. The types and sources of data are primary data and secondary data. Data analysis techniques were carried out through data reduction, data presentation, and drawing conclusions.

The results showed that the dynamics of the sundrang tradition in marriage on Sapeken Island were greatly influenced from time to time, both in terms of the times and changes in the content of the sundrang, in 1948 the sundrang was given in the form of a sundrang. Silver or gold metal, sundrang traditions such as those with sufficient economic status only used pets or garden products as sundrang gifts, such as chickens or garden products such as coconuts and bananas. But as time goes by now in 2022, the era is more modern, there is no more giving sundrang like that, but sundrang is valued at nominal money so that many social deviations and other problems arise if this is not fulfilled.
