

IMPLEMENTATION OF BUMDes IN IMPROVING COMMUNITY WELFARE

(Case Study of Traditional Market Management in Moncek Tengah Village, Lenteng District, Sumenep Regency)

Abstract

The strategy in making it easier for some villages to get sources of income is that the government makes policy regulations that regulate this, one of which is in the old Law no. 32 of 2004 article 213 paragraph 1 concerning local government which states that village governments are also recommended to have BUMDes. Therefore, based on the background of the research that has been described, the formulation of the problem that will be studied is 1. How is the Implementation of Traditional Market Management as a business unit managed by BUMDes to improve the welfare of the Central Moncek Community, Lenteng District, Sumenep Regency, this study uses a qualitative descriptive method,

according to Sutopo (2002) is a method used to solve problems by describing in detail and in depth the portrait of conditions about what actually happened according to what was found in the field. The place of this research is in Moncek Tengah Village, Lenteng District, Sumenep Regency. Sources of data in this study include primary data consisting of Central Moncek Village, Village Treasurer, BUMDes director, BUMDes operational manager and the community of Central Moncek Village. From the results of data analysis in chapter IV, the authors can conclude as follows: First, in implementing the BUMDes business which aims to improve the economic level of the community, it is by providing business capital in the form of money, the amount of which is in accordance with the type of business and skills training to process agricultural products into basic ingredients for snacks such as training to make marning for the community to have a role in traditional market management. While the return system is every month with a percentage of 60% for managers and 40% for BUMDes.
