

## **ABSTRACT**

**INCREASING THE LEARNING OUTCOMES OF VOLLEYBALL UNDERPASSING USING WALL MEDIA FOR CLASS STUDENTS X-TKJ SMK WAHIDIYAH TAMBAKSARI RUBARU SUMENEP SCHOOL YEAR 2023-2024:2024,RAMDAN NUR WAHYUDI**

***Keywords : Volleyball, Underpassing, Learning Outcomes***

*Wahidiyah Tambaksari Rubaru Vocational School students as a whole have not been able to master the basic technique of passing under a volleyball. This is because in one class when learning volleyball underpassing the technique was not optimal in carrying out volleyball underpassing techniques.*

*The researcher wants to provide materials and learning to students so that students are able to understand and carry out the basic volleyball underpassing technique properly and correctly. This research aims to improve the learning outcomes off volleyball underpassing for SMK Wahidiyah Tambaksari Rubaru Sumenep Vocational School students through the application of learning variation.*

*The researcher this time used the PTK ( Classroom Action Research ) method which was carried out using 2 cycles, each of which was carried out in meetings with a sample of 20 students. The resurts of the research showed mastery of the bottom pass technique in the volleyball game. In the first round there were 2 students who could make bottom passes while the other 18 sinas have not been able to do it properly and correctly. Students who where initially unable to perform the downward passing movement, when the researchers provided material and further learning in the second cycle to Wahidiyah Tambaksari Rubaru Sumenep Vocational School, were able to understand and perform the downward passing technique well and correctly.*

*Of the 20, there is 1 student who cannot do the bottom patting technique while wa able to do it well and correctly.*
