

ABSTRACT

Utilizing the school environment in learning theme 6 (caring for animals and plants) sub-theme 2 (caring for animals around me) class II at Talango II Elementary School.

Keywords: School Environment, Thematic Learning

This study aims to determine the use of the school environment in learning theme 6 in sub-theme 2 of class II at SDN Talango II. This research is a qualitative research. The subjects of this study were grade II students at SDN Talango II. The object of research is the school environment.

This research uses a qualitative approach to the type of field research. Data collection techniques used were interview, observation, and documentation techniques. The data that has been obtained is then analyzed by the steps of data reduction, data presentation, and drawing conclusions.

The results showed that grade II teachers at SDN Talango II made use of the school environment such as fish ponds and bird rides in the learning process theme 6 (caring for animals and plants) subtema 2 (caring for animals around me) to support the learning process and learning objectives were achieved. It can be concluded that in the learning process, the school environment at SDN Talango II is also used in the learning process as a learning resource to support the learning process and learning objectives are achieved easily.
