

## Abstract

Abstract Hani Fitriani, (2020): The Effectiveness of Group Guidance Services with Problem Solving Techniques to Improve Student Learning Achievement in Junior High Schools in SMPN 1 Pakong. This research is a Pre-experimental research with the one group pre-test post test design. The purpose of this study is to determine the effectiveness of group counseling services with problem solving techniques to improve student achievement in SMPN 1 Pakong School. This research was conducted on SMPN School students 1 Pakong in 2020. The number of subjects in this study were 28 students, namely one experimental class which is a sample research with technique. This research instrument was made with a questionnaire scale and tested for validity and reliability using SPSS 25.

The results showed that student achievement before being treated with group guidance with problem solving techniques had increased from the low category and after being given treatment with group guidance with problem techniques solving has increased to a high category with.

So, it can be concluded that there are differences in pre-test and post-test, meaning that group guidance services with effective problem solving techniques to improve student achievement seen from the results of data analysis that Asymp. Sig (2-tailed) of 0.005 when compared with 5% significance then  $0.036 < 0.05$  so that the alternative hypothesis was accepted, then  $H_0$  was rejected and  $H_a$  was accepted.
