### **Correlation Of Self Efficacy To The Learning Responsibilities Of Student Of Class VIII At Smp Negeri 5 Sumenep In The 2018/2019 School Year.Hozaimah**

**Keyword : Self Efficacy, Learning Responsibilities**

#### **Abstract**

This study aims to find out and understands' learning responsibilities and to increase their sense of responsibility in students. Subjects studied were student of class VIII A, VIII B and VIII C of SMP Negeri 5 Sumenep in the 2018/2019 school year, totalling 30 people. From the observation made showed that the sense of responsibility possessed by state junior high school 5 student is relatively low, it is based on factors that emerge, such as lack of supervision from parents, work after school and an environment that is less supportive of student character, so many obligation and unfinished tasks.

This study uses a quantitative approach with a correlational type that data obtained in the field if processed using SPSS version 16.0 for windows. The method in this study uses interview techniques, observation and questionnaire instruments, this is done to obtain data related to the subject of research.

The results of this study are questionnaires distributed to students on August 3 2019. It show that the hypothesis in this study has a significant relationship or effect between self efficacy on student learning responsibilities. So it can be concluded that the hypothesis in this study is that  $H_0$  is rejected and  $H_a$  is accepted. Then the magnitude of the influence or relationship between self efficacy on the learning responsibilities of student of class VIII A, VIII B and VIII C of SMP Negeri 5 Sumenep is  $0,03 < 0,05$  with an error level of 5%
