

ABSTRACT

Rahma, Emiliatur. 2020. The application of pair check in improving student learning outcomes through visual media on the theme of the beauty of togetherness subtheme in the diversity of the 4th grade student of Kepanjin sumenep city districk school year 2019-2020.

Keywords : Model *Pair Check*, Learning Outcomes, Visual Media

His Research purpose to describe the application of the learning models pair check with visual media in improving student learning outcomes.

This research is a classroom action research study consisting of four stages: Planning, implementing, observing, and reflecting. Data collection techniques in this study used tests and observations. The test is used to determine the improvement in student learning outcomes, and observation is used to determine the achievement of the learning process.

The results showed that the application of the pair check learning model with visual media was considered to be able to help students in understanding the material, so that student learning outcomes had increased in each cycle. in the pre-cycle stage, Indonesian language lessons reached 40,90%, IPS 27,27%, and IPA 13,63%. While in the second cycle Indonesian language lessons reached 63,63%, IPS 45,45%, and IPA 27,27%. In cycle II, Indonesian language studies reached 86,36%, IPS 90,90%, and IPA 95,45%. In cycle III, Indonesian language studies reached 90,90%, IPS 95,45%, and IPA 95,45% and had achieved an indicator of success which was 70%.
