

ABSTRACT

Pengaruh Perkembangan Teknologi Informasi dan Komunikasi Terhadap Sikap Mandiri Siswa SDN Aengbaja Raja Sumenep Tahun Pelajaran 2019/2020.
Iko Hardiansyah

Keywords: Development of technology, information and communication, independent attitude

The development of information and communication technology can be used to improve the quality of life and shape values or behaviors that increasingly respect life on earth. The nation's generation must have an independent attitude that can always adapt to any conditions according to development in order to be able to deal with problems wisely. The purpose of this study was to determine whether there is an influence of the development of information and communication technology on the independent attitude of Aengbaja Raja Sumenep Elementary School students in 2019/2020 Academic Year.

The design in this study included survey research. This type of research is quantitative. The study consisted of 2 variables, namely the development of information and communication technology as the independent variable (X) and independent attitude as the dependent variable (Y). The number of samples in this study were 39 respondents. The sampling technique in this study used purposive sampling. Data collection techniques using observation and questionnaires. Data analysis techniques using simple linear regression.

The results showed that the significant value was 0,000. Because the value is smaller than alpha ($0,000 < 0.05$), it can be seen that the development of information and communication technology (X) affects the independent attitude (Y) of Aengbaja Raja Elementary School students in Bluto District, Sumenep Regency, 2019/2020 Academic Year. The magnitude of the influence of the development of information and communication technology affected the independent attitude of Aengbaja Raja Sumenep Elementary School students in 2019/2020 Academic Year by 47.4%, and the rest (52.6%) was influenced by other factors not raised in this study.
