*The types of this research is classroom action research, there are 2 cycles in this research with research locaton at SDN Pinggir Papas II. This research aim to describe this increase in teacher activity, student activity, and improvement of student learning result by applying Word Square learning model and subject of research is teacher and student second grader. The result obtained from the learning results in the first cycle is 69% has increased in two cycle get 90%. Teacher activity data in cycle I is 76,25% has increased in cycle 2 get 90%. And students activity in cycle I is 75% has increased in cycle II get 91,25%. From the data obtained can be concluded that the word square learning model can improve students learning outcomes.*
