

## ABSTRACT

*This study describes the 2019 corona virus disease (Covid-19) outbreak that has hit 215 countries in the world, providing its own challenges for educational institutions. To fight Covid-19, the government has prohibited crowds, social distancing and physical distancing, wearing masks and always washing hands. To prevent the spread of Covid-19, WHO gave an appeal to stop events that can cause crowds to gather. Therefore, face-to-face learning that gathers many students in the classroom is reviewed for its implementation. Learning must be carried out with scenarios that are able to prevent physical contact between students and teachers and students with students (Firman, F., & Rahayu, S., 2020). According to Milman (2015) the use of digital technology can enable students and teachers to carry out the learning process even though they are in different places. The form of learning that can be used as a solution during the COVID-19 pandemic is online learning.*
